

Chapter 21: We Are All Mortal

Addenda Sheet as of December 1, 2023

The Rules:

5.5e End Turn Phase (correction):

- Second sentence should say, "If a player's DR is less than or equal to his DL..."

7.1 How to Read the Cards (clarification): Note that a side's DL marker can go below 0, i.e. to the other side (which increases the chances of a War breaking out as the other side has less room for maneuver as whenever the markers meet up, War happens).

13.7 UN Intervention (correction):

- Second bullet: The "DVP reduction" entry should be "DVP increase".

14.1 Communist Set Up (correction):

- Should be only 2x Mig-21 air units (not 3).

14.2 US Set Up (corrections):

- Use the US Carrier Air Unit Pool on the PAC as there are no holding areas for each aircraft carrier.
- There is no "Stateside Holding Area". Place all US units (including the 1st Infantry Division but not the 2x CIA units) in the US Available Ground Units holding area of the PAC. The 2x CIA units are set aside and only enter the game via card play.
